

# Netcad Action

## Netcad Action

### Description

Netcad Action opens Netcad program by clicking on a button / connection, etc. It can be used in data source display editor etc.

⚠️ Xml in NetgisServer Data \ Ncc folder, should has same name with Netigma application name.

The file downloads when the Action is clicked. If the web browser automatically opens the downloaded file, the Netcad application will open and the file will be opened.

## Action Features
